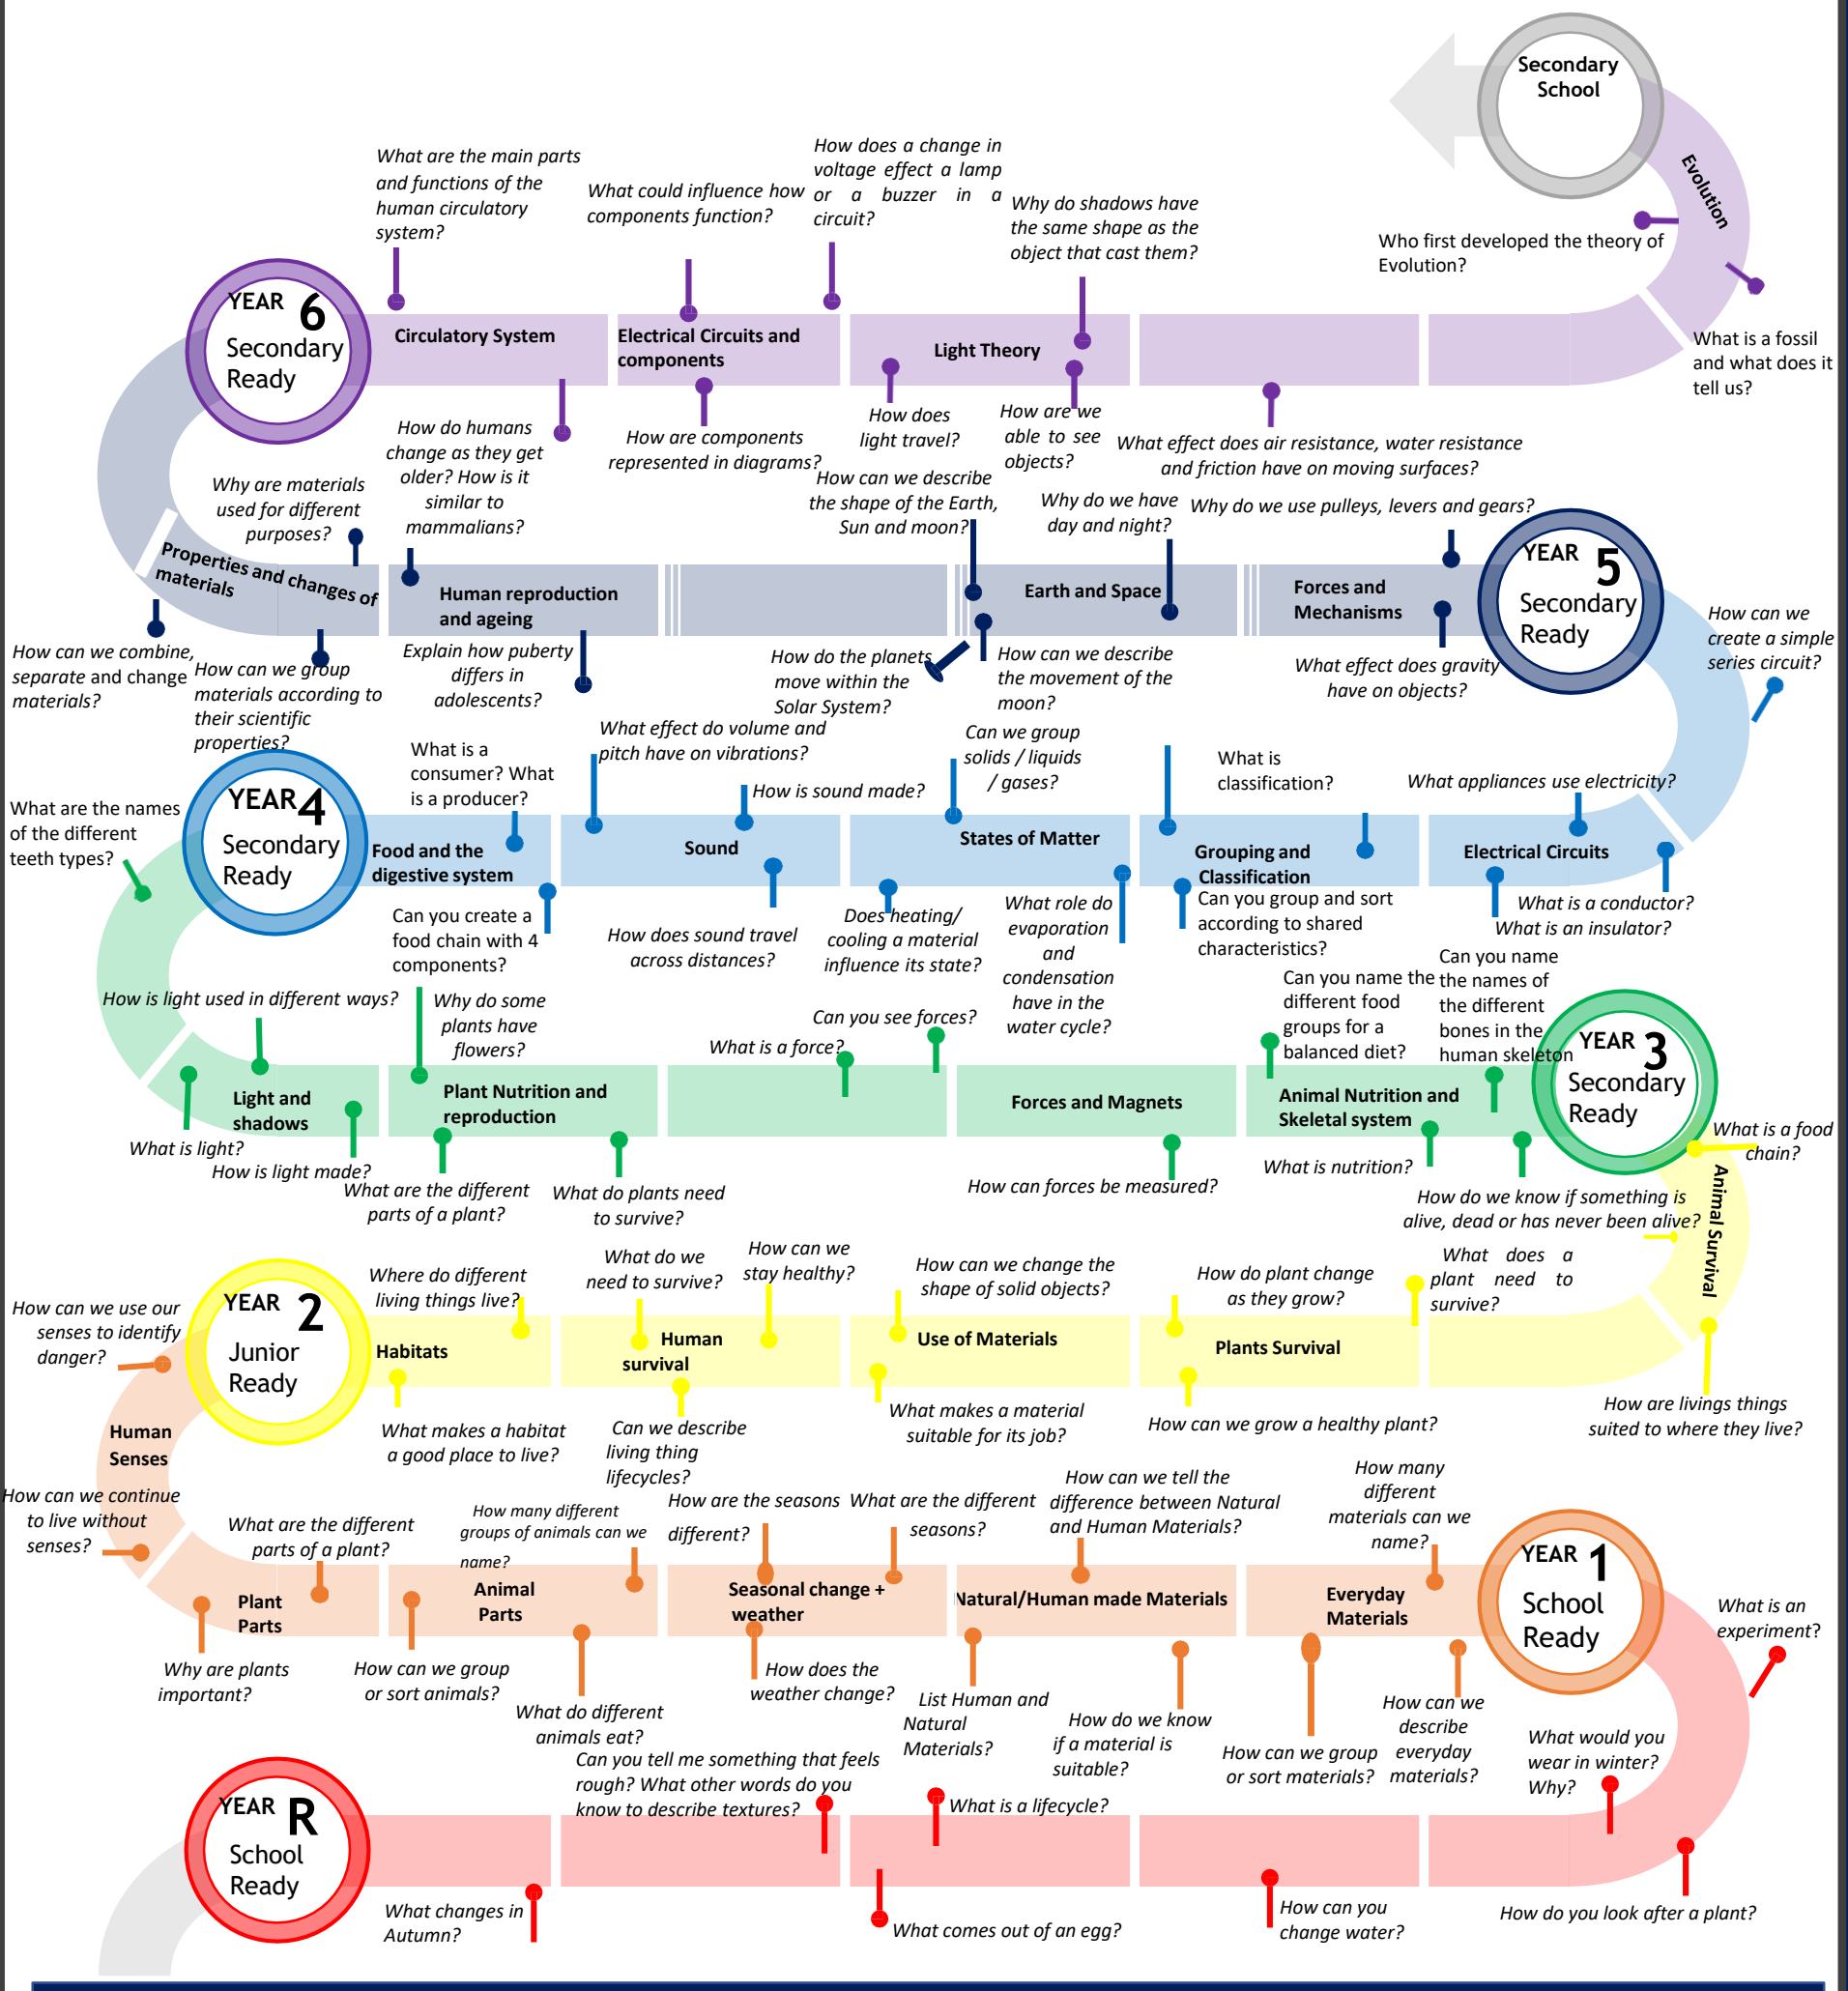
Science Curriculum Track

Through building up a body of key knowledge and concepts, pupils at Bligh Primary School will be encouraged to work scientifically and develop a sense of excitement and curiosity about natural phenomena, preparing them for each stage of their learning. By the end of their time at our school, our wish is that every child can ask scientific questions and use a variety of approaches to conduct investigations in order to answer these. Ultimately becoming Secondary Ready and providing our children with a choice in their future.

Bligh Primary
A School with Heart



Bligh Primary School – A School with HEART.
